

# SageMaker Analysis Report

This report contains model analysis for candidate **Canvas1722902012725-trial-me**. The candidate was generated by the AutoML job **Canvas1722902012725**.

The **Canvas1722902012725-trial-me** candidate is a trained **TimeSeriesForecasting** model whose objective is to **Minimize** the "**AverageWeightedQuantileLoss**" quality metric.

## Contents

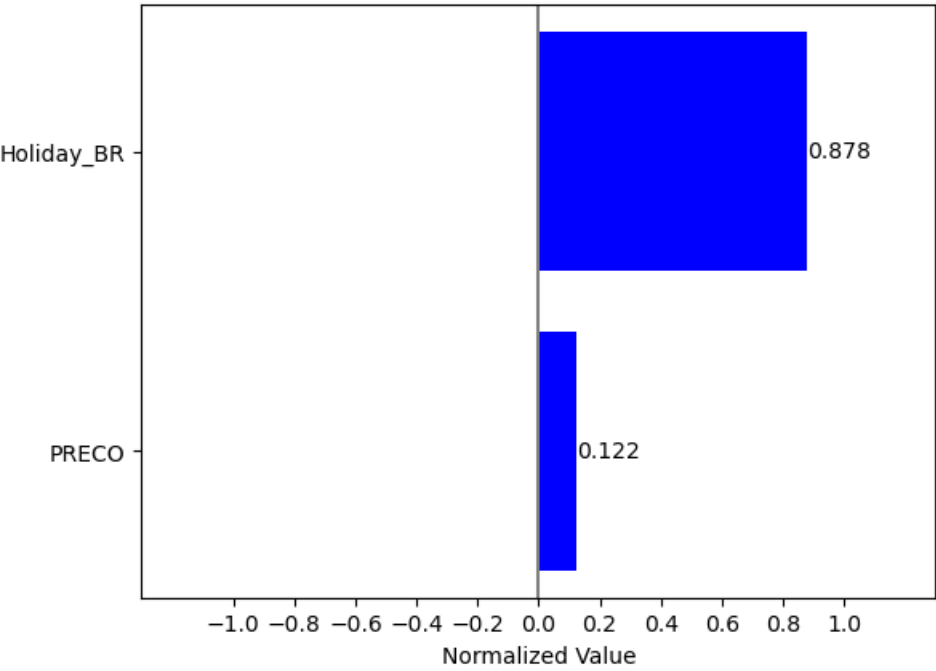

- 1. [Autopilot job details](#)
- 2. [Normalized Explainability plot](#)
- 3. [Explainability table](#)

## Autopilot job details

Title	Value
Autopilot candidate name	Canvas1722902012725-trial-me
Autopilot job name	Canvas1722902012725
Problem type	TimeSeriesForecasting
Objective metric	AverageWeightedQuantileLoss
Optimization direction	Minimize

## Explainability plot

The graph below provides a way to visualize the normalized explainability scores for the features used by the timeseries forecasting model.

**Explainability table**

Feature Name	Absolute Value	Normalized Value
PRECO	0.002100	0.121600
Holiday_BR	0.014900	0.878400
